Inventory Management System

This is a command-line-based Inventory Management System built with Python and MySQL. It provides functionalities for managing users, admins, inventory, suppliers, and orders.

System Requirements

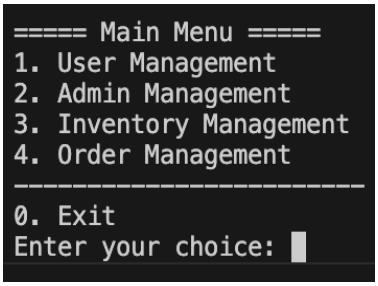

- Python Version: 3.12.8
- MySQL Server: 8.0.40
- Required Tools:
    - Virtual Environment (venv)
    - mysqldump (for database export/import)

File Structure

```
